A MONTESSORI EDUCATION

The goal of early childhood education is to cultivate your child's own natural desire to learn. The Montessori classroom, with its prepared activities and trained adults, is structured to promote this natural process of human development. The Montessori preschool classroom provides opportunities to move, touch, manipulate, and explore. It gives children the freedom to choose their own activities without unnecessary interference from an adult. In this environment, children learn to work independently, based on their own activities, building concentration and self-discipline. The goal of a Montessori education is not to develop all children to be high achievers but to develop children into becoming the best version of themselves.

30. Now that you have ch	osen Sterling Montessori	as your school of choic	ce for your child's education,
please share with us y	our vision for your child's	experience in a Monto	essori classroom.

31. Is there anything else we should know about your child?
